ABOUT ME

Over 5 years I've delivered analytics and data pipelines for clients including: Avangrid (US), MercadoLibre, Unilever and Samsung. Data engineer and consultant at NTT DATA, Media.Monks, Accenture and Grupo Mirgor. Two of those engagements included full platform migrations: Cloudera → Azure, and Teradata → BigQuery, where I migrated historical tables ranging from hundreds of millions to over 6 billion rows.

What I work with:

- Pipelines & processing: Azure Data Factory, Apache Spark, Scala, Python
- Warehousing & SQL: BigQuery, Teradata, SAP HANA, query optimization
- Analytics & reporting: Power BI, SQL reporting for enterprise stakeholders
- Currently building with: dbt, Apache Airflow, PostgreSQL, GitHub Actions, and LLM APIs

EXPERIENCE

Tech reskilling

Argentina
July 2026 - Present

Continuing professional development: dbt, Apache Airflow, PostgreSQL, GitHub Actions, LLM APIs (Anthropic, OpenAI) for data workflows. Building and shipping portfolio. Projects on GitHub repo: <https://albanosanturio.github.io/>

Career break

Australia - New Zealand
Oct 2023 - June 2026

Working holiday across Australia and New Zealand, funded by operational, client-facing work: factory, warehouses, hospitality, logistics.

Data Engineer

NTT Data

Argentina
Sep 2022 - Sep 2023

Client: Avangrid - among the largest energy production and distribution firms in USA
Migrated an on premises cloudera system to Azure, refactored scripts and ETLs to report and provide insights on daily energy meters data (usage and shortages). Modeling of the Azure Datafactory pipeline to feed the forecasting models (energy outages)

- Python scripting
- Cloud migration: Cloudera to Azure
- ETL pipelines on Azure Synapse

Tools used: Azure Cloud, Cloudera Hadoop, Spark, Scala, Docker, Python, SQL Server, PostgreSQL, Azure DataLake

Analytics Consultant
Media.Monks

Argentina
Oct 2021 - Sep 2022

Client: Mercadolibre - biggest ecommerce/marketplace/epayments firm in LATAM

Warehouse migration from Teradata to BigQuery.

Started and completed an in-house project to retrieve insights about the covid impact on consumer behaviour for the biggest e-payments platform in LATAM. Data modeling and reporting for massive data warehouse. (All transactions on Argentina-Colombia-Brasil)

- Data warehousing - external partner - migration and maintenance.
- Analytics - Data QA
- ETL migration - data flows/ ETL jobs in python and SQL

Tools used: SQL, BigQuery, DataStudio, Python

Management Consultant
Accenture

Argentina
Feb 2021 - Oct 2021

Client: Unilever - top FMCG industry

Implemented a business planning solution (Kinaxis) integrating client's data with software requirements.

- Business analyst, documenting business requirements and user stories
- Data cleaning, analysis & integration (planning/supply chain data, POs, invoices, etc)
- Support to Solution Architects, PMs, Scrum masters

Tools Used: Python, Jupyter Notebook, SQL, Jira

Business Analyst
Mirgor

Argentina
Feb 2018 - Feb 2021

Client: Samsung Electronics & In house

Mirgor is the licensed partner in charge of production and distribution for Samsung Electronics. Tracked and forecasted sales for all lines of business, reported on last mile delivery status, integrating in-house ERP (SAP) with e-commerce data (V-TEX). Intensive use of Business Intelligence dashboarding tools (Power BI mainly)

- Business analytics for different in-house BUs (ecommerce / retail / automotive)
- Dashboarding & data analysis
- Web analytics @samsung.com, sales funnel, views to impressions to purchases
- Market segmentation and ad revenue analysis for e-commerce
- Sales performance and forecasting analysis

Tools Used : Power BI, Python, Jupyter Notebook, SQL, Google Analytics, SAP Hana

Internship - Commercial
Groupe PSA

Argentina
Jul 2016 - Feb 2018

Internship - ERP help desk
Calipso

Argentina
Feb 2016 - Jul 2016

SKILLS

Cloud & Infrastructure: Azure (Data Factory, Synapse), GCP (BigQuery, certified), AWS, Cloudera Hadoop

Data Engineering & Processing: Apache Spark, Scala, Python, SQL, dbt, Apache Airflow, Airbyte, PostgreSQL

Analytics & BI: Power BI, Tableau, DataStudio, Streamlit, Jupyter Notebooks, SQL reporting

Data Governance: data quality, dimensional modeling, Collibra

Portuguese: - Advanced, (CELPE-Bras exam, i.e. Brazilian portuguese for foreigners)

English: - Bilingual (FCE + living abroad)

EDUCATION

University of Buenos Aires, Argentina	2012-2019
Industrial Engineering	

Digital House, Argentina	2022
Data Science certificate	

Coderhouse, Argentina	2026
AI automation certificate
